Professional profile

I'm passionate about technology and how it can make people's lives easier. I have experience in software quality and software development with an emphasis on digital accessibility. I'm an accessibility enthusiast and have an interest in related areas. Not only that, but I have 15 years' experience in IT and over 5 years as a professional quality analyst.

Tech Stack

- **Accessibility:** WCAG 2.2, WAI-ARIA, VoiceOver, Talkback, NVDA, Axe Dev Tools, Access Monitor, WAVE Evaluation Tool, Colour Contrast Analyzer, WAVE, Google Lighthouse.
- **Software Quality:** Jira, SilkTest, Mantis, Confluence, Cucumber, Gherkin, Shift Left, BDD, TDD.
- **Test Automation:** Cypress, Selenium WebDriver, Postman, Insomnia, Jest, RSpec, Capybara, PHPUnit, Jest
- **Languages:** PHP, JavaScript, Kotlin, Ruby.
- **Operational Systems:** Windows, Linux, Unix;
- **Methodologies:** Scrum, Kanban, XP;
- **Other Tools:** AWS, Git, GitlabCI, NewRelic, Laravel, Jenkins, BrowserStack, Maven, NPM, Yarn, Gulp, Vite, Composer, Docker.

Education

Degree in Information Systems - Completed in 2010 – Faculdade Pitágoras

Professional Experience

NTT DATA Europe & LATAM

Specialist in Testing

June 2021 to Present

As a Senior QA Consultant with a focus on accessibility, I mentor the entire team from a quality and career perspective. I use industry best practices to create and maintain a sustainable quality culture.

I have produced several in-house training courses on assistive technologies, automated tests focused on accessibility. Furthermore, I was also a member of the research and innovation center of excellence and helped with technical testing proposals.

I won the Top Performance award and was considered one of the most outstanding performers.

I currently work for one of the largest banks in Latin America, ensuring that the user journey is accessible to anyone.

Concrete Solutions Assurance

Quality Assurance

Jan 2021 to Jun 2021

As a quality analyst, my main responsibilities were to ensure the testability and quality of the software, helping to identify critical scenarios and provide predictability in our deliveries. I worked with automated mobile tests using Appium and helped the development and design team with accessibility concepts.

Monetizze

Quality Assurance

Monetizze Ago 2017 to Dec 2020

As a Quality Analyst, I was responsible for ensuring the quality of Membertizze, one of the company's most important products. I made a significant contribution to the team's agility. I was also a member of the Quality and Software Engineering committees, fostering discussions and solutions to our daily problems.

Likewise, I wrote automated tests to validate the application's accessibility, assisted the development team and participated in building standards for code review and effective testing.

The most important thing I did: 80% gain in the performance of service tests (API) in continuous integration, with this optimization we drastically reduced the execution time in the pipeline.

Language

- English – B2 Intermediary
- Portuguese – Native Speaker
